X Marks the Spot

Picture yourself stranded on a deserted island with nothing but what's in your pockets.

There's no safe passage back to civilization.

You're surrounded by the ocean on your left. And a jungle on your right.

There's not a soul to be found.

The sun is getting lower and lower.

When nightfall takes over, you know you're going to be cold, hungry, and in the pitch black dark.

But don't panic!

When you reach in your pocket, you find the one tool you take with you everywhere that will help you survive.

Your Outdoor Tesla Lighter, Featuring "Plasma X" Technology

The twin arcs on this powerhouse form a sizzling hot "X". Together the arcs feed off each other to spark up a blazing, hot fire on demand.

This state-of-the-art "Plasma X" lighter:

- Produces **NO** Flames!
- Makes **NO** Smoke!
- Uses **NO** Fuel!
- Works When **Wet**!
- Is 100% **Windproof**!

And it's a brilliant DayGlo orange so it's always easy to find.

The Outdoor Tesla lights flawlessly each and every time because of the unique “Plasma X” design.

The twin plasma arcs on this powerhouse form a sizzling hot “X”. Together these arcs feed off each other to spark up a blazing, hot fire on demand.

You can use it reliably for:

- Lighting your campfire
- Cooking your food
- Heating your shelter
- Signaling for help
- Smoking your tobacco

No more fussing with disposable lighters that let you down when you need them the most.

No more dangerous butane leaks from a refillable lighter.

And a single charge lasts for hundreds of lights.

The Outdoor Tesla comes with a convenient USB cord you can use indoors with a home power source.
